

The Online Technician's exam is now available. The Practical components are now included in the Online exam. The CP from the Firm shall certify that the Technicians have successfully balanced both Air and Hydronic Systems as required and are proficient in TAB. Technicians who have not completed the CT process must register for the Online Exam to complete the certification process.

APPLICATION / QUALIFICATION CRITERIA:

A NEBB TAB Certified Firm, who is in good standing with NEBB, must currently employ the Candidate. The Candidate must demonstrate competency, reliability, cooperativeness, sound judgment, high ethical standards, and the ability to work independently in a safe, professional manner. The Candidate must satisfy one of the following conditions in order to complete the Certification Process. All Candidates must take the NEBB Online Exam in order to be certified. Prerequisites are as follows:

- 1) Successful completion of the NEBB TAB Technician Home Study Course AND must also have at least two years employment with a minimum of 1,000 hours per year of documented TAB fieldwork experience within the last two years.
- 2) Four years employment with a minimum of 1,000 hours per year of documented TAB fieldwork experience within the last four years
- 3) Provide documentation of having completed a program (other than the NEBB program), which is acceptable to NEBB on an individually approved basis. If a Candidate has completed a program, other than the NEBB previously approved programs, the Candidate must include all relevant information concerning that program with his application. Samples include: TABB Training and Certification, AABC Training and Certification, completion of a NEBB local, regional or National Training Review Seminar or current enrollment in an Apprentice Training Program that includes Testing-Balancing Procedures.
- 4) Other. Submit a Resume for review. This is for the Candidates who are potentially qualified but do not appear to meet the 3 listed prerequisites. The purpose of this box is to allow the Candidate to sit for exam or be scheduled to be tested while the submitted resume is reviewed. The intent is to not hold up any applications while this process is being done. No Certifications will be issued until all prerequisites have been satisfied and or time requirements have been fulfilled.

The following is a generalized listing of skills and/or responsibilities of a Technician:

- Implement and perform the work.
- Possess basic knowledge of report forms.
- Identify problems.
- Comply with common safety practices.
- Use instrumentation properly.
- Have a basic knowledge of controls.
