Steve Wiggins

Mr. Wiggins has over 45 years of experience in optimizing building operations. His work has involved commissioning, retrocommissioning, and operations and training activities on educational, research, cultural, health care, and corporate projects. Mr. Wiggins has been responsible for more than 400 projects for over 30,000,000 square feet of facilities. Widely published and a sought-after speaker, he often teaches certification seminars for commissioning and retrocommissioning professionals. Whether a complex facility on a health care campus, in academia or private industry, or on a military base, Mr. Wiggins has expertise in making buildings perform at their best.

Jim Bochat

James Bochat has been involved in the Arizona Engineering and Construction industry for over forty years. His experience includes Mechanical Design, Mechanical Construction, Controls, Test & Balance, Commissioning, Retro Commissioning and On-Going Commissioning. He is a former President of the National Environmental Balance Bureau (NEBB) organization and has been instrumental in developing and teaching commissioning standards for NEBB. He has been involved with ASHRAE serving as chair of the Professional Development Committee and the PMP Best Practices Committee, and voting member of other ASHRAE committees.

KFI-Engineers is an Engineering Design and Commissioning consulting firm providing MEP Engineering, Commissioning, Retro Commissioning and On-Going Commissioning and building testing services to Facility Owners.

About This Seminar:

The introduction of ANSI/NEBB S120-2019, Third Edition along with the enhanced Technical Retro-Commissioning (RCx) program, has allowed NEBB to produce a significant business opportunity for contractors, TAB professionals, engineering and commissioning firms providing corrective action for under-performing buildings, improving indoor environment and comfort, and optimizing energy usage for aging facilities.

Technical RCx-EB is the technical process of improving building systems by inspecting, testing, analyzing, calibrating, repairing, adjusting, and optimizing building systems. The RCx process allows for the training of operators for improving building performance covering such items as: building systems, energy-utilizing equipment, and operating schedules as well as optimization of these elements for maximum efficiency. The seminar will cover the main content domains in the RCx-EB Body of Knowledge (included in the RCx-EB CP Candidate Handbook Appendix).
